

**The Innovators of Quality Framing and Lath Systems**

## **LEED Certification Information**

CEMCO is pleased to join the efforts of the U.S. Green Building Council and LEED ® program that improves environmental and economic performance of commercial, industrial and residential buildings.

The LEED ® program certifies buildings that meet standards utilizing energy, environmental design, and products as defined the LEED® rating system. The use of CEMCO products, can help contribute points in specific categories.

**Recycled Content:** Recycled steel content used in the fabrication of the CEMCO cold-formed steel products, are in compliance with the Requirement for Environmental and Recycled Content Materials. CEMCO steel suppliers have indicated that their steel contains approximately 25 to 30 % recycled steel. The steel products are manufactured from steel consisting of approximately the following contents: 72.5% Virgin Content, 12.8% Post-Consumer, and 14.7% Post-Industrial.

**Local /Regional/ Materials;** CEMCO's primary locations are City of Industry and Pittsburg, California and Denver, Colorado.

If you require any further assistance, please contact CEMCO. (800) 416-2278
